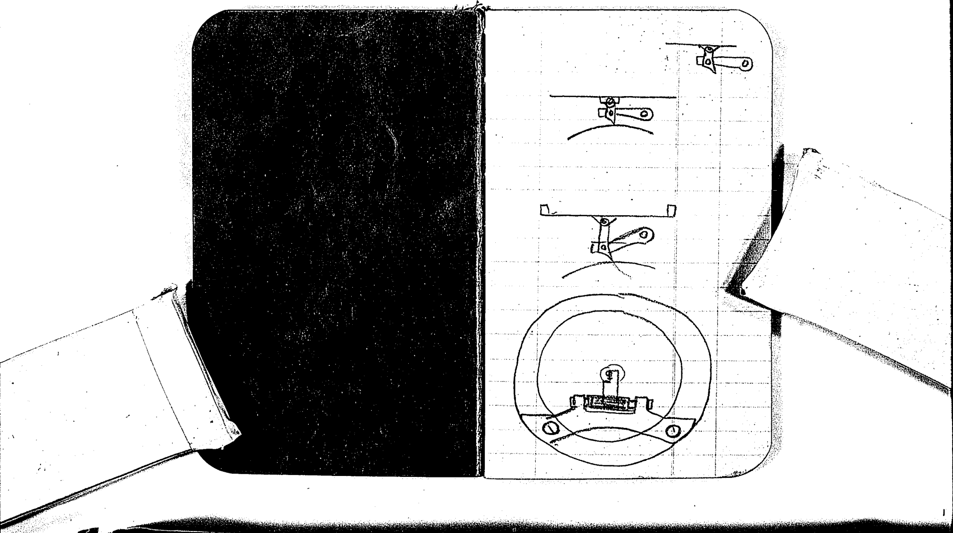
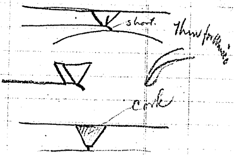
Notebook, PN-Undated.4

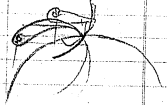
This pocket notebook was used by Edison in the late 1880s or early 1890s for notes and drawings relating to the phonograph. The pages are unnumbered. Only 9 pages have been used.

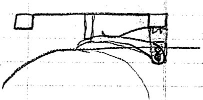


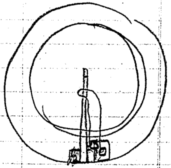


short
Thus following
Cork

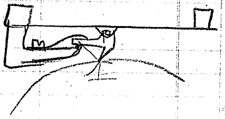
The receiver should have a lever stiff so as to get rid of Lateral vibrtns its bearing should be long & below (ie) just opposite Recorder

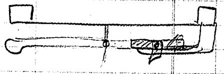


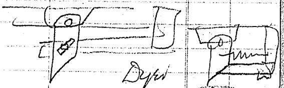




good



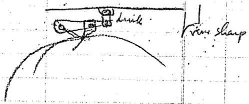




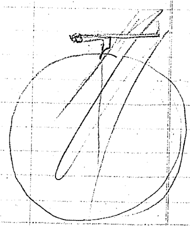
Dyer

Dyer

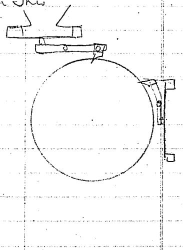
This is probably best



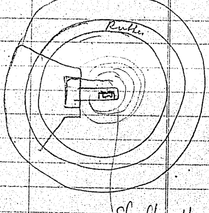
double
very sharp



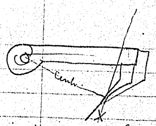
If down movement is quicker
& sharper than return on Recorder
then this



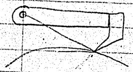
1/8 inch Rubber rings 1/2 again as thick, Shellackd permanently to glass 006 @ 007 glass no thinner, see caliper of that in new trans.



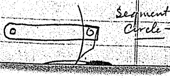
Shellac thick at first + taper down to nothing within $\frac{1}{8}$ inch Edge —



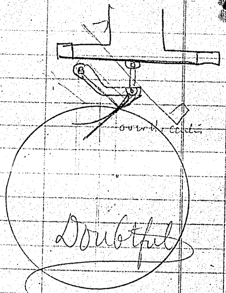
Possibly angle X should be adjusted to suit position of Centers In fact its probably a vital point Should be a right angles to Center of lever



or perhaps

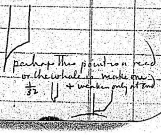


Segment of the Circle —



a
b
over the centre

Doubtful



perhaps this point is a reed
or the whole is make one
$\frac{1}{32}$ + weaken only at end
